Objectives

- Aspiring software engineer with a strong foundation in computer engineering principles and a curiosity for emerging technologies.
- Hands-on project experience in building practical solutions such as data-driven systems and web-based applications.
- Enthusiastic team player with strong communication skills, eager to collaborate on innovative tech-driven projects.

Education

- **SAL Institute of Technology and Engineering Research**
 - Affiliated with Gujarat Technological University (GTU)
 - Bachelor of Engineering in Computer Engineering (Expected Graduation: May 2027)

Skills

- **Programming Languages:** Python(learning), java, HTML, CSS, SQL
- **Data Structures & Algorithms:** Basic understanding; strengthening in progress
- **Future Learning Goals:** Python libraries (Pandas, NumPy, Matplotlib), Machine Learning, and Web Development with Django/Flask.
- **Soft Skills:** Communication, Teamwork, PR management

Projects

1. Bank Appointment Management System

- Designed a system to streamline the appointment process for Indian bank users.
- Provided users with clear guidance on required documents to minimize repeat visits and improve efficiency.
- Technologies: React.js, MySQL, RESTful API, OAuth2.0.
- Status: Currently in the initialization phase.

2. Studiova

- Developed a web application using Django framework, implementing core functionalities and database integration.
- Utilized the Django admin panel to manage data models, users, and content efficiently.
- Gained hands-on experience in backend development, authentication, MVC architecture, and deployment using PythonAnywhere while building the project.

Interests

- **Bike:** Enthusiastic about riding and exploring different bike models.
- **Engines & Mechanics:** Passionate about understanding motorcycle engines, machines, and their performance.
